 Strafford Rivers Conservancy

The Strafford Rivers Conservancy is a nonprofit land trust dedicated to conserving the natural resources, beauty, and character of Strafford County.

We work with willing landowners to permanently conserve land and provide project management services to municipalities and other partners who need help managing the complicated land conservation process. In addition, the Conservancy regularly monitors conserved properties to ensure that the conservation restrictions are being met. We educate landowners and the public about conservation and provide opportunities for people to learn about and enjoy conserved properties.
